

Drafting Roving from Silk Hankies

1. Take a pile of silk hankies

2. Carefully take off one of the fine layers

3. One Silk Hankie

4. Hold each side of the silk hankie, poke a hole in the centre with your fingers, then gently pull your hands apart

5. Keep pulling gently

6. Pull until it looks smooth

7. You will probably have some thin parts and thick parts, hold the roving either side of the thicker parts and pull slowly to thin them out

8. You should have a nice long loop of roving 😊
